APTELY

Phase 2 Product Roadmap

Interview Pipeline → Offer → Onboarding

Building on the talent intelligence foundation of Phase 1,
Phase 2 closes the loop: from shortlist to first day on the job.

2025 – 2026

PHASE 2 — END-TO-END JOURNEY

Each phase outputs structured data that feeds into Aptely's talent intelligence layer

PHASE 01

Interview Scheduling Engine

Smart Slot Proposal

AI reads recruiter calendar + candidate availability and proposes 3 optimal interview windows automatically.

Panel Coordination

Multi-interviewer sync: platform books across all participants and handles timezone offsets with a single link.

Auto-Confirmation Flow

Confirmation emails sent to all parties. Reminders at 48h and 2h before. One-click reschedule option.

Video Link Generation

Auto-generates Zoom/Meet/Teams links per interview. No manual scheduling overhead for recruiters.

Key Outcomes

70%

reduction in scheduling back-and-forth

3x

faster time-to-first interview

Zero

double-bookings or timezone errors

Tech: Calendar API integrations (Google, Outlook) + in-platform availability grid

PHASE 02

Interview Execution & Signal Capture

Before Interview

- Auto-generate structured interview guide from Role DNA
- Push guide to all interviewers 24h prior
- Attach talent Capability Record for quick review
- Define question scoring rubric per skill dimension

During Interview

- In-platform live scoring form for interviewers
- Structured note-taking tied to skill dimensions
- Red flag tagging (e.g. vague answers, role mismatch)
- Time-stamped evidence capture per question

After Interview

- Auto-aggregate all interviewer scores per dimension
- Conflict detection (large score variance → flag for review)
- AI summary of notes → role fit signal
- Prompt recruiter to make a decision within 24h

Outputs feed directly into the Talent Scoring Framework (Skill Validity + Capability Strength Scores)

PHASE 03

Decision Engine & Candidate Communication

Recruiter Decision Workflow

1. **Review aggregated score dashboard**
   All interviewer signals in one view
2. **One-click decision: Advance / Reject / Hold**
   With mandatory reason selection
3. **System triggers communication**
   Personalised email dispatched within 60 seconds
4. **Candidate feedback recorded**
   Stored in Talent Capability Record

Communication Templates

Acceptance

Warm, personalised advance email. Next steps, timeline, and contact details auto-filled.

Rejection

Respectful rejection with optional feedback summary. Maintains brand experience.

Hold

Transparent hold notice with expected decision date. Keeps candidate engaged.

Offer Preview

Pre-offer email teasing compensation range and role details before formal offer.

All communications are logged against the role and talent record — enabling audit trail + pattern analysis

PHASE 04

Offer Management & Negotiation Tracking

Offer Letter Generation

- Auto-populate from Role DNA: title, comp, benefits, start date
- Editable template with version history
- PDF export + in-platform e-signature (DocuSign / native)

Negotiation Tracker

- Log counter-offers and recruiter responses in structured threads
- Track delta from initial offer on salary, equity, start date
- Auto-flag if negotiation exceeds company-defined limits

Countersign & Approval Flow

- Multi-party signing workflow: candidate → hiring manager → HR
- Deadline tracking with automatic reminders
- Signed offer stored to talent record + company docs

Offer Analytics

- Acceptance rate by role type, seniority, sector
- Average time-to-sign tracking
- Drop-off analysis: where candidates disengage

Offer management closes the recruiter's placement loop — critical for premium fee justification

PHASE 05

Onboarding Setup & Day-1 Readiness

Pre-Boarding Checklist Timeline

Day 0 (Offer Signed)

- Send welcome email
- Collect personal docs via secure portal
- Share company handbook + culture deck

Week -2

- IT provisioning request triggered
- Set up email, Slack, tools
- HR paperwork (contracts, tax forms)

Week -1

- Manager intro email automated
- Day-1 schedule delivered to talent
- Buddy/mentor assigned and notified

Day 1

- Checklist completion verification
- First-week plan visible in talent portal
- 30-60-90 day goals shared

Why This Matters for Aptely

Tracking onboarding completion feeds the Reliability Index → repeat demand → platform moat. Recruiters who close deals AND deliver successful starts command 2x the fees.

Post-placement data (retention, performance) seeds the reputation layer described in Phase 1 roadmap

IMPLEMENTATION STAGES

Phase 2

Stage 1

Weeks 1–4

No-Code Foundations

Calendly / Cal.com · Make/n8n · Mailchimp or SendGrid

- Interview scheduling via Calendly + calendar sync
- Email triggers (acceptance / rejection) via Make automation
- Offer letter template in PDF form (DocuSign integration)
- Airtable as onboarding task tracker

Stage 2

Weeks 5–10

Productized Workflow

Bubble / WeWeb · Xano / Supabase · OpenAI API

- In-platform scheduling UI with availability grid
- Interview guide auto-generation from Role DNA (GPT-4)
- Live scoring forms with real-time aggregation
- Automated comms engine with personalisation tokens

Stage 3

Weeks 11–20

Scalable Platform

Next.js · Supabase · DocuSign API · Custom ATS hooks

- Full offer management module with e-signature
- Negotiation thread + version tracking
- Onboarding portal for candidates (document upload, checklist)
- Analytics dashboard: time-to-sign, acceptance rates, drop-off

Each stage produces recruiter value independently — start charging from Stage 1

SUCCESS METRICS

How We Know Phase 2 Is Working

Time-to-Interview
< 24h from shortlist

Scheduling Round-trips
0 manual emails needed

Interview Score Completion
> 90% of interviewers submit structured scores

Comms Response Rate
> 85% candidate reply to accept/reject within 48h

Offer Acceptance Rate
> 75% (industry avg: ~65%)

Time-to-Sign
< 3 days from offer to countersign

Onboarding Completion
100% pre-boarding checklist done by Day 1

Review metrics weekly in Stage 1, monthly in Stages 2–3. Each becomes an Aptely platform KPI visible to recruiting partners.

FROM SHORTLIST
TO FIRST DAY.

Phase 2 completes the Aptely promise: a recruiter who opens the platform in the morning and closes placements by end of week — with every step logged, every signal captured, and every candidate treated with care.
