PHASE 4

APTELY

Staff Management

From Day 1 to Long-Term Performance

Phase 4 closes the full talent lifecycle. Once a hire is made, Aptely becomes the operating system for managing, developing, and retaining that person — for HR teams and employees alike.

2026

aptely.io

OVERVIEW

Phase 4 — 6 Staff Management Modules

01

Performance Tracking & Reviews

Continuous feedback cycles, structured reviews, score history

02

Goal Setting (OKRs / KPIs)

Company → team → individual goal alignment and tracking

03

Retention & Churn Risk Signals

Early warning system for flight risk across the organisation

04

Learning & Development

Skill gap mapping, learning plans, and progress tracking

05

Team Structure & Org Chart

Live org chart, reporting lines, headcount planning

06

Compensation & Salary Reviews

Structured review cycles, market benchmarking, approval flows

Both HR teams and employees access these modules — HR configures and monitors; staff self-serve and contribute

MODULE 01

Performance Tracking & Reviews

Continuous Feedback Loop

Managers and peers submit lightweight feedback at any time — not just at review cycles. Structured around role outcomes, not generic ratings.

Structured Review Templates

HR configures review templates per role type. Quarterly check-ins, mid-year reviews, and annual appraisals with consistent scoring dimensions.

360° Feedback Collection

Employees nominate peers for review. Platform aggregates multi-source scores and flags variance between self, manager and peer ratings.

Performance History Timeline

Full longitudinal view of every review, score trend, and feedback received. Visible to employee and manager — no surprises at review time.

Review Cycle

Monthly

Pulse check

Quarterly

Check-in + goals

Mid-year

Deep review

Annual

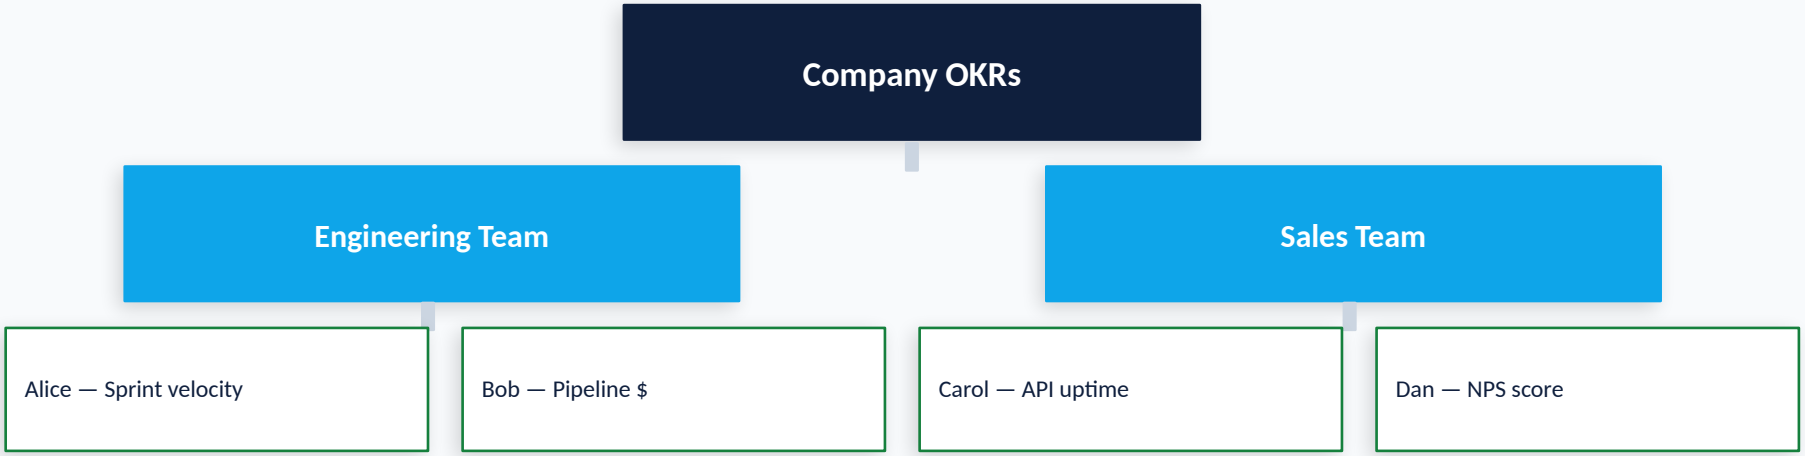

Full appraisal

Performance scores feed directly into Retention Risk signals and Compensation review triggers — data does the work

MODULE 02

Goal Setting — OKRs & KPIs

Goal Cascade

OKR Builder

HR sets company OKRs. Managers cascade to team level. Employees create personal KPIs that link up the chain.

Real-Time Progress

Each KPI has a target, owner, and current value. Updated manually or via integrations (Jira, Salesforce, etc.).

Alignment Score

Automated score showing how well individual goals connect to team and company priorities. Flags orphaned goals.

Goal attainment rate feeds performance scores — the system builds a complete employee effectiveness picture automatically

MODULE 03

Retention & Churn Risk Signals

The platform's most strategic feature — identifying who's about to leave before they hand in their notice.

What Builds the Risk Score

Performance Decline
3+ month downward trend in review scores or KPI attainment

Goal Misalignment
Personal goals no longer connected to team or company OKRs

L&D Disengagement
No learning activity in 60+ days or dropped learning plan

Compensation Gap
Salary >15% below market benchmark for role and seniority

Tenure + Peer Departures
Employee passed typical promotion window; peers have left

Feedback Sentiment
Negative language patterns in written feedback submissions

Risk Dashboard

Sarah K.	Risk: HIGH	82
James M.	Risk: MEDIUM	61
Priya N.	Risk: MEDIUM	54
Tom B.	Risk: LOW	28

HR receives weekly retention risk digest — with one-click actions: schedule 1:1, trigger L&D plan, flag for comp review

MODULE 04

Learning & Development Tracking

Skill Gap Engine

- Compare current Talent DNA against role requirements
- Surface gaps by skill category: technical, leadership, domain
- Auto-generate a development priority list per employee
- Update when role scope changes or promotion is triggered

Learning Plan Builder

- HR or manager creates a structured L&D plan per employee
- Link goals to specific courses, books, mentors, or projects
- Set milestones and completion targets
- Employee can self-add learning activities for manager approval

Progress & Impact Tracking

- Track completion of each learning activity
- Map skill improvement to post-learning performance scores
- L&D ROI report: investment vs measurable skill gain
- Badge awarded on Talent DNA when learning verified

L&D completions automatically update the employee's Talent DNA — the same profile recruiters saw when they were hired

MODULE 05

Team Structure & Org Chart

Live Org Chart

Auto-generated visual org chart from employee records. Updates instantly when reporting lines change. Exportable as PDF or image.

Role & Headcount Planner

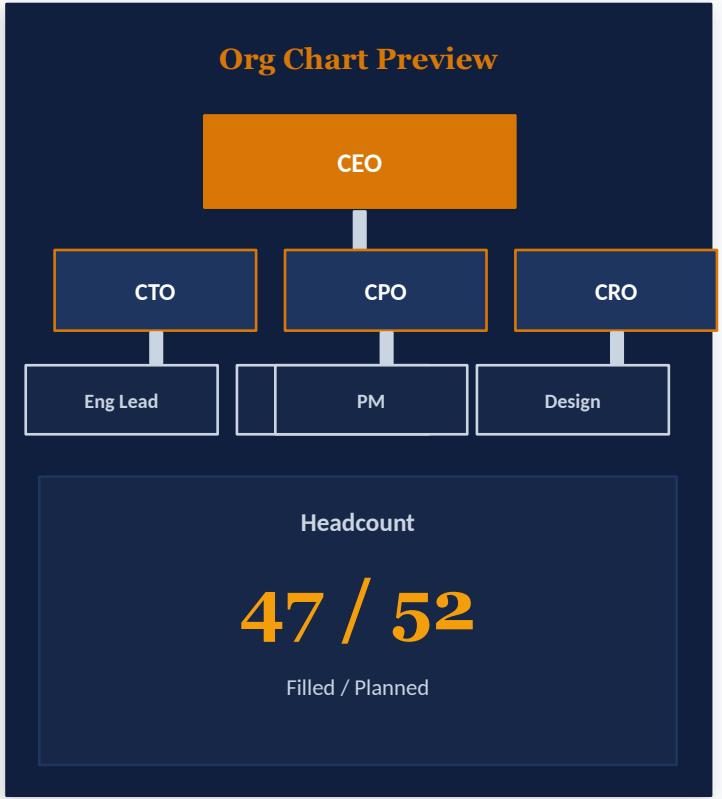

HR maps planned vs actual headcount per team. Open roles link directly back to the Aptely recruiting pipeline in Phase 1.

Span of Control Analytics

Flags managers with too many or too few direct reports. Surfaces structural imbalances before they cause performance issues.

Succession Planning

Tag employees as succession candidates for key roles. Succession plans are private to HR and senior leadership.

5 open roles link directly back to Phase 1 matching — the org chart becomes the source of truth for hiring demand

MODULE 06

Compensation & Salary Reviews

Structured Review Cycle

- Annual and ad-hoc salary review workflows
- Manager submits recommendation → HR approves → Finance signs off
- Deadline tracking and automated reminders at each stage

Market Benchmarking

- Salary bands per role level and location, updated quarterly
- Each employee's position within band shown to HR
- Flags employees below 25th percentile automatically

Equity & Bonus Tracking

- Equity grant history and vesting schedule per employee
- Bonus eligibility and payout tracking per review cycle
- Pay equity audit: gender, tenure, and level comparisons

Approval & Audit Flow

- Multi-level approval chain: manager → HR → Finance → CEO
- Every decision timestamped and logged for audit trail
- Employee notified with final outcome and effective date

Compensation data is HR-only by default. Employees see their band position but not absolute figures of peers

DESIGN

Two Portals, One Platform

HR teams and employees each get a purpose-built view of the same underlying data.

HR Team View

Full workforce dashboard
Aggregate view of performance, retention risk, L&D completion and headcount across all teams.

Configures all review cycles
Creates templates, sets timelines, assigns reviewers, and approves manager submissions.

Sees risk signals & flags
Full churn risk dashboard with drill-down per employee and recommended interventions.

Manages comp & equity data
Complete visibility into salary bands, market position, and approval workflows.

Runs org planning
Edits org chart, creates roles, manages headcount plan, and links to recruitment pipeline.

VS

Employee Self-Service View

Personal dashboard
Own performance trend, current goals, L&D plan progress and upcoming review dates.

Submits self-assessment
Contributes to their own review with structured self-evaluation before manager input.

Manages OKRs & KPIs
Creates and updates individual goals, tracks progress, and links to team objectives.

Accesses learning plan
Views assigned and self-selected learning activities, logs completions, and earns badges.

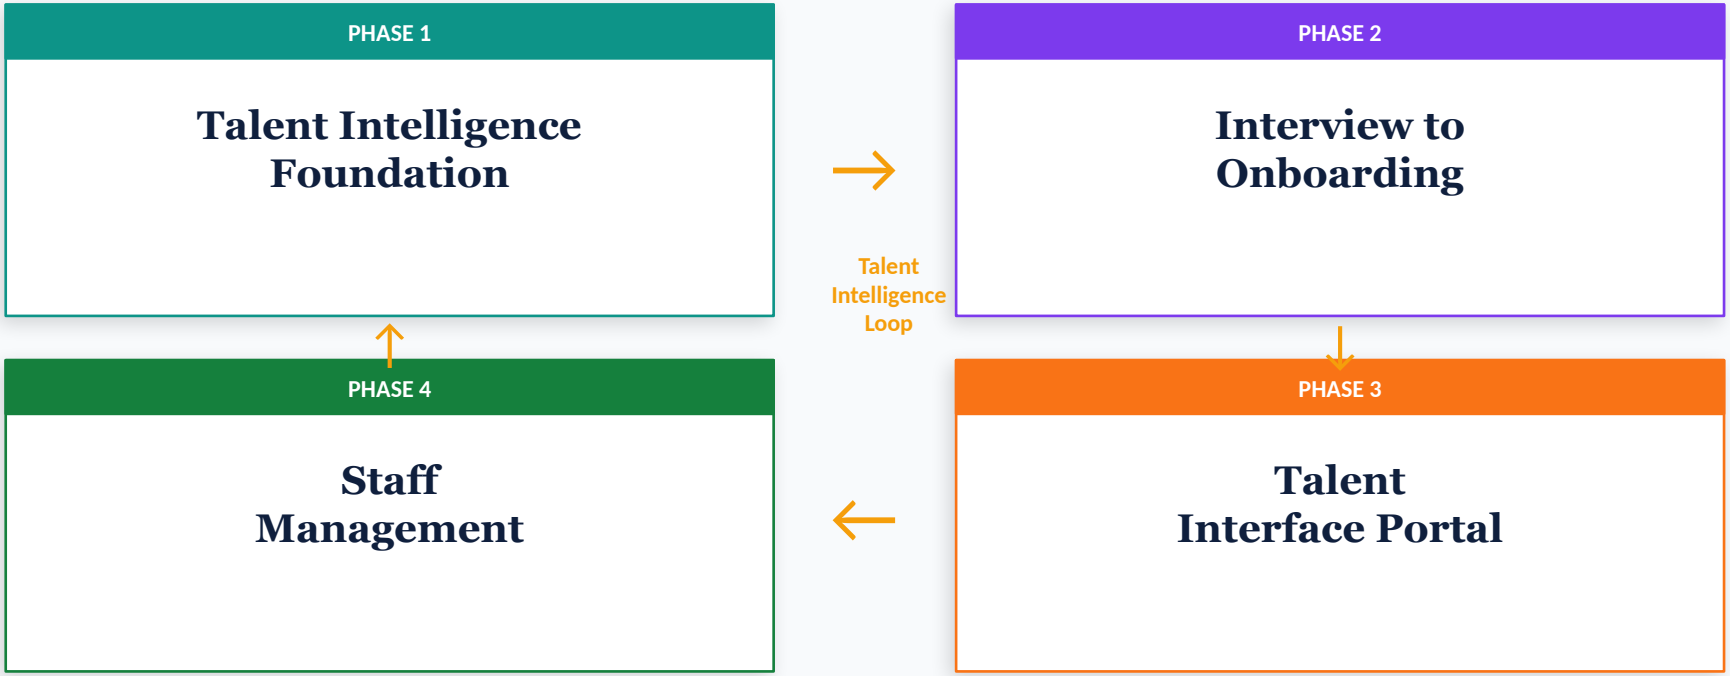

Sees own comp band position
Knows where they sit within their salary band — empowering, not just administrative.

Privacy controls ensure employees see only their own data — HR sees aggregates plus individual drill-downs where authorised

INTEGRATION

The Full Aptely Loop — All 4 Phases

Every phase feeds the next. Phase 4 closes the loop — sending performance and retention data back to the start.

P4 performance data → updates Talent DNA in P1 → improves future matches → better hires → stronger P4 performance

IMPLEMENTATION

Build Stages — Phase 4

Stage 1

Weeks 1–5

Core HR Foundation

Airtable / Notion · Make / n8n · Google Forms · Softr

- Employee record database (role, manager, start date, salary)
- Manual performance review form + structured scoring sheet
- Goal-setting form linked to employee records
- Basic org chart view in Softr portal

Stage 2

Weeks 6–14

Interactive HR Product

Bubble / WeWeb · Xano / Supabase · OpenAI API · ChartMogul

- In-platform review cycles with automated scheduling and reminders
- OKR / KPI builder with cascade logic (company → team → individual)
- Retention risk scoring engine (rules-based with 6 input signals)
- L&D plan builder with learning activity tracking and progress view

Stage 3

Weeks 15–26

Full Platform

Next.js · Supabase · Workday/BambooHR API hooks · ML risk model

- 360° feedback module with sentiment analysis on written responses
- Compensation module: bands, benchmarking, approval workflows
- ML-driven churn risk model trained on historical placement outcomes
- Employee self-service portal (mobile PWA) + HR analytics dashboard

Stage 1 delivers standalone value in under 5 weeks — HR can start structured performance reviews immediately

SUCCESS METRICS

How We Know Phase 4 Is Working

Review Completion Rate
> 95% of scheduled reviews submitted on time

OKR Alignment Score
> 80% of employee goals linked to team or company OKRs

Churn Risk Accuracy
Flag at-risk employees 60+ days before resignation

Voluntary Turnover Rate
< 10% annually (industry avg: 13–18%)

L&D Plan Completion
> 70% of assigned learning activities completed on time

Comp Review Cycle Time
< 14 days from manager submission to final approval

Employee Portal Engagement
> 80% of employees log in at least once per month

Review metrics monthly in Stages 1–2, weekly in Stage 3. All KPIs feed the Aptely intelligence layer

Phase 1
Foundation

Phase 2
Interview→Offer

Phase 3
Talent Portal

Phase 4
Staff Management

The Talent Lifecycle, End to End.

Aptely now manages the full journey: sourcing → vetting → hiring → onboarding → performing → growing → retaining.

Every data point feeds the next decision. Every placement makes the platform smarter.
